Title: COMPUTERIZED PRESCRIPTION SYSTEM FOR GATHERING AND
PRESENTING INFORMATION RELATING TO PHARMACEUTICALS

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

**DECLARATION OF PRIOR INVENTION IN THE UNITED STATES
OR IN A NAFTA OR WTO MEMBER COUNTRY TO OVERCOME
A CITED PATENT OR PUBLICATION 37 C.F.R. § 1.131**

I, Christian Mayaud, am the named inventor of the '841
Application.

The present '841 Application is a continuation of United
States Patent Application Serial Number 09/121,596, filed July
24, 1998 (currently pending), which is a continuation of United
States Patent Application Serial Number 08/942,372, filed
October 2, 1997 (now U.S. Patent number 5,845,255), which is a
continuation of U.S. Patent Application serial number 08/330,745
filed October 28, 1994 (now abandoned).

From at least a date prior to December 13, 1993, until the
date my '841 Application was filed, I continuously worked on my
invention, set forth in the '841 Application, by meeting with
and communicating with my patent attorneys, who were drafting my

application, as well as continuing the process of building apparatus and processes to carry out my inventions.

For many many years, it has been my practice to keep detailed notes of my daily activities, and schedules in a personal appointment book system. The appointment book system that I used had a separate notebook for each calendar month. Each notebook was bound with a spiral ring. It has further been my practice to keep these appointment books from year to year.

At the request of counsel I searched for and found my appointment books for the years 1993 and 1994. I recently reviewed these appointment books and searched for entries related to the filing of the '841 Application. Attached hereto are copies of these relevant pages from my personal appointment books. The entries in these appointment books were made by me contemporaneous with the dates indicated.

On a date prior to December 13, 1993, I retained a Patent Law Firm to file a patent application for my said inventions. From a date prior to December 13, 1993 and up to October 28, 1994 I continuously and regularly met and communicated with my patent attorneys who drafted my patent application. As a result of continuous and diligent meetings and communications with my patent attorneys, a patent application was drafted resulting in the '841 Application, which had 172 typewritten pages in the specification and 16 sheets of drawings. The '841 Application was filed with 69 claims which included three independent claims. In order to draft this application, considerable amount of time was necessary to meet and communicate with my patent

attorneys and review each claim as well as to review the entire specification and the drawings and flow charts. The specification drafted by my patent attorneys included at least 35 separate sections detailing and describing my invention, which required the numerous meetings and communications with my patent attorneys to draft. In addition, during this time, I met with vendors of products to determine if their products could be used in my system. I also met continuously with developers of my system.

At all times from a date prior to December 13, 1993 through the filing date of my '841 Application, both my patent attorneys and I were diligent in preparing and filing my '841 Application for patent.

I respectfully bring attention to the following entries, by date and in quotes below, in my appointment books, on the following dates, copies of these pages are the attachments hereto:

December 1, 1993. "call Tony Handal re patent application." Anthony Handal, was the patent attorney I retained to draft my patent application. He was with the firm of Handal & Morofsky, 80 Washington Street, Norwalk, CT 06854.
